

R/V W.T. Hogarth Florida 2018 Ports Tour

The recently launched R/V W.T. Hogarth is a 78-foot coastal class vessel built from the ground up in Tarpon Springs Florida to be a state-of-the-art research vessel. Costing over \$6 million dollars, this vessel will serve as a floating laboratory for decades to come advancing oceanography and training the next several generations of marine scientists across the State. The Hogarth will be on display and open to the public at major ports around the state of Florida for a limited period this spring. Please join us at one of the port events below to learn more about this remarkable new research vessel, the Florida Institute of Oceanography and its 30 members.
